**! LOW COST !**  
**X-RAY FILM STORAGE & RECORD STORAGE**  
**WITH OPTIONAL ELECTRONIC DELIVERY**

NCD is excited to offer medical facilities an opportunity to have X-Ray film and/or paper record files physically stored in a modern, environmentally controlled and highly secure underground facility. But even more exciting, when you need access to these files, you can contact the facility via the web and request files (X-Ray and/or paper) to be e-mailed as electronic images or hardcopy delivered. Just think, you can request a DICOM image of an X-Ray film and have it electronically uploaded to your PACS system. This service is less expensive than traditional record storage services.

NCD has entered into a partnership with EDCO, one of the country's most successful medical records conversion and storage services. Together NCD & EDCO brings you the best in automation, archiving, and competitive pricing. Our services are available nationally. Contact us now to find out how to reduce your cost of storage and increase your speed to access critical information.

Don't forget to ask us about e-WIX hosting services if you would like to look into a service that would keep all your information online without a capital investment. View an online demo at [www.e-wix.com](http://www.e-wix.com).
