

MEDICAL IMAGING SERVICES

DICOM / DOCUMENT IMAGE REPOSITORY SERVICE

(THE PACS ALTERNATIVE)

**DICOM
Images**

You can have instant access to DICOM Images without buying PACS or other expensive solutions.

**Document
Images**

Medical records, accounting, insurance forms or any paper files can be scanned free and hosted on the e-WIX service.

Archiving

We can store film and/or paper files at our facilities and we can convert them to images on demand so you can access them electronically.

Security

We have several back-up systems, a co-location site and we store duplicate data on RAID, spanned disks, DLT tape and removable disk. We use multiple firewalls and 128bit encryption. We have a user/file tracking log and we are HIPAA compliant.

Solution

Data will be transferred to our servers, stored, managed and accessible using a standard web browser to access e-WIX ASP hosting systems via the Web. We deliver instant access of DICOM header and/or document data to your desktop. The entire solution is an outsourced service eliminating costly and time consuming system implementations.

Costs

You do not have to purchase hardware, software or use other capital resources. You pay an economical monthly fee based upon the number of workstations accessing and the amount of storage used.

Advantage

We not only store compressed lossless images on multiple systems but we store the DICOM images on DVD media and archive them at our facility. You will never be in a position where you cannot produce the original DICOM image should it be necessary.

Next
